THE CALDWELL WATCHMAN—COLUMBIA, LOUISIANA

NOTICE

Notice is hereby given, pursuant to Article IV, Section 21(D)(1) of the Louisiana Constitution, that on January 21, 2022, Entergy Louisiana, LLC ("ELL"), a public utility providing retail electric and gas service in certain parishes throughout the State of Louisiana, filed with the Louisiana Public Service Commission ("LPSC") its Application of Entergy Louisiana, LLC for Approval of the Withdrawal of Certain Tariffs and the Modification of Others ("Application"). Through the Application, ELL seeks to withdraw the following rate schedules and rate riders: AS-G; ASP-G; CM-G; EAPS-G; EAPS-L; EER-G; EER-L; EOPF-L; ER-DRS-G; FTS-L; LAIPS-L; LCOP; MSS-G; MYER-G; MYER-L; OL-L; PM-G; and SPS-G. No customers are currently served by any of these rate schedules and rate riders.

Additionally, ELL's Application proposes modifications to the following rate schedules and rate riders: OS-G; L-L; OBR; SMC-O; ALS-G; ALS-LED; CCL-L; DSL-L; HPSV-L; LED-SL-G; LED-SL-L; LS-G; RLU-L; SHL-G; and SHL-LED. The proposed revisions to these rate schedules and rate riders are reflected in the filing to the LPSC. The majority of the proposed modifications are clarifications to tariff terms that do not have a direct effect on rates, with the exception of fees associated with a limited number of new lighting rate categories.

For questions and comments regarding ELL's filing, please call the LPSC toll free at (800) 256-2397. Additionally, the filing, including its attachments may be viewed in the Records Division of the LPSC at the following address:

NOTICE

Notice is hereby given, pursuant to article IV, section 21 (D)(1) of the Louisiana Constitution, that on January 31, 2022, Entergy Louisiana, LLC ("ELL"), a electric and natural gas public utility having facilities to permit the local distribution of natural gas to residential, commercial, and municipal customers in East Baton Rouge Parish, filed with the Louisiana Public Service Commission ("LPSC") or "Commission" its Evaluation Report pursuant to its Gas Operations Rate Schedule Plan ("RSP") for the test year ended September 30, 2021 ("TY 2021"), in accordance with LPSC Order No. U-35370.

ELL's Gas Operations RSP filing, if approved by the Commission as filed, will result in a rate increase of approximately \$3,852,067 annually, effective with the first billing cycle of May 2022. However, due to the approval of Louisiana Constitutional Amendment #2 in November 2021 affecting base tax rates ("Tax Legislation"), ELL did not have adequate time to reflect the effects of the Tax Legislation in its annual RSP Evaluation Report due on or before January 31, 2022. ELL's filing indicates that the tax rate in effect at the time the Evaluation Report is filed shall be utilized. As such, ELL intends to supplement its Evaluation Report in April 2022 to include the effects of the Tax Legislation.

ELL's RSP filing for the TY 2021 Test Year reflects an Earned Return on Equity ("EROE") of 4.33% and pursuant to the terms of the RSP, this EROE requires a rate adjustment by ELL. It is estimated that the rate increase will have the following effect on typical monthly customer bills: a Small General Service customer using 50 CCF will increase \$5.77, from \$52.35 to \$58.12; a General Service customer using 500 CCF will increase \$33.15, from \$419.06 to \$452.21; and a Large General Service customer using 10,000 CCF will increase \$346.26, from \$6,283.21 to \$6,629.47.

For questions and comments, please call the LPSC toll free at (800) 256-2397. Additionally, the Company's filing and its attachments may be viewed in the Records Division of the LPSC at the following address:

VIOLATION NOTICE

The East Columbia water System is currently in violation of the maximum contaminant level (MCL) for total trihalomethanes and haloacetic acids as set forth by the State (Part XII) of the Louisiana State Sanitary Code (LSAC 51:1318) and the Federal Primary Drinking Water Regulations (40 CFR Part 141).

The United States Environmental Protection Agency (EPA) and the Louisiana Department of Health (LDH) set drinking water standards and requires the disinfection of drinking water. When disinfection is used in the treatment of drinking water, disinfectants combine with naturally occurring organic and inorganic matter present in water to form chemicals called disinfection byproducts (DBPs). EPA and LDH set standards for controlling the levels of disinfectants and DBPs in drinking water, including trihalomethanes (THMs) and haloacetic acids (HAAs). Some people who drink water containing THMs in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous

Chronic Wasting Disease confirmed in Louisiana deer

TENSAS PARISH - A case of Chronic Wasting Disease has been confirmed in a Louisiana white-tailed deer in Tensas Parish.

According to The National Veterinary Services Laboratory (NVSL), the first confirmed case of CWD was found in Louisiana after diagnosis was made on samples submitted by LDWF staff from a hunter harvested, wild adult buck taken on private land in Tensas Parish.

The LDWF regulates alternative livestock in regard to agricultural businesses in Louisiana, which includes farm-

raised white-tailed deer. While the confirmed case was not from a deer pen, LDWF says their objective is to ensure that alternative livestock in the state are healthy and well-cared for and stay that way.

"The program requires inspection, population control, and record-keeping by the LDWF to ensure the overall health of the deer herd," said LDWF Commissioner Mike Strain, D.M.V.

Additionally, LDWF performs annual inspections of all pens. The inspections are to ensure the pens are in good condition and deemed secure, they

say. "It will take diligence from all parties to help control the spread of CWD in Louisiana, this includes our permitted deer pen licensees," Strain said.

In light of the confirmed case of CWD, LDWF encourages permitted deer pen licensees to:

- Maintain and inspect deer herds throughout the year.
- Maintain and inspect all fencing on a regular basis.
- Maintain good record-keeping on all pens. This includes electronic implants; permanent ear tattoos; and ear tags; the pur-

chase, sale, and transfer of all deer; health certificates issued on each deer; and fencing repairs, replacements, or upgrades.

LDWF says that CWD is a neurodegenerative disease of white-tailed deer and other members of the family Cervidae. It is caused by a prion, an infectious, misfolded protein particle, and is 100 percent fatal in affected deer after an indeterminate incubation period.

There is no treatment or preventative vaccine for CWD.

CWD-infected deer may exhibit signs of weight loss and emacia-

tion, salivation, frequent drinking and urination, incoordination, circling, and lack of fear of people. It always results in the death of the animal.

Although CWD has not been shown to be contagious to humans, the Centers for Disease Control and the World Health Organization recommend against the human consumption of deer known

to be infected with CWD.

The LDWF will provide testing for hunter-harvested deer free of charge.

For more information on the permitted deer pen license, call the Office of Animal Health at 225-925-3980.

Straight-tail crawfish: Dangerous?

BATON ROUGE - The LSU Ag Center has challenged another crawfish-related myth.

Researchers at the Ag Center looked into the claim that you shouldn't eat crawfish that you straighten tails after boiling.

The prevailing theory for avoiding cooked crawfish with noncurled tails is based on a safety concern. The theory goes that cooked crawfish with straight tails were dead before cooking and, without knowing how long the animals had been dead or how they were stored, it is best to avoid consuming them.

To figure out what the truth is, researchers W. Ray McClain and

John Sonnier put dead crawfish into a cooler with live crawfish for five days and then boiled them. They also "restrained" crawfish by straightening their tails using a wooden stake and rubber bands. They boiled all these crawfish together to see what happened.

Turns out, the crawfish that had been dead for five days didn't have straight tails; they curled up just like the live ones did.

"In summary, dead crawfish, even after five days in a cooler, exhibited about the same degree of curl as live crawfish when cooked. Also, in live crawfish where the abdomen was prevented from curl-

ing naturally during the cooking process, the abdomen remained relatively straight," the researchers found. The latter observation suggests that at least some of the straight tails observed at a crawfish boil may be caused by crowding in the pot that upsets the natural process of tail curling during cooking," the study states.

"Therefore, this study suggests that the age-old adage of avoiding straight-tailed crawfish at a crawfish boil, as a means of ensuring safety and quality, may not be reliable and certainly has little to do with the living status of the animal at the time of cooking."

Hyundai, Kia recall thousands of vehicles over fire risk

DETROIT - Hyundai and Kia are telling the owners of nearly 485,000 vehicles in the U.S. to park them outdoors because they can catch fire.

The recalls from the two Korean automakers are an-

other in a long string of fire and engine problems that have dogged the companies for the past six years.

The problem is contamination in the antilock brake control module that can cause an electrical short.

Affected are certain Kia Sportage SUVs from 2014 through 2016, and the 2016 through 2018 K900 sedan.

Recalled Hyundai's include certain 2016 through 2018 Santa Fe SUVs, 2017 and 2018 Santa Fe Sports,

the 2019 Santa Fe XL and 2014 and 2015 Tucson SUVs.

Dealers will replace a fuse. In addition, Hyundai dealers will inspect the control modules and replace them if needed.

Report due on or before January 31, 2022. ELL's RSP requires that the tax rate in effect at the time the Evaluation Report is filed shall be utilized. As such, ELL intends to supplement its Evaluation Report in April 2022 to include the effects of the Tax Legislation.

ELL's RSP filing for the FY 2021 Tax Year reflects an Estimated Return of Equity ("EROE") of 2.62% and pursuant to the terms of the REP, this EROE requires a rate adjustment by ELL. It is estimated that the rate increase will have the following effect on typical monthly customer bills: a Small General Service customer using 50 CCF will increase \$3.77 from \$82.35 to \$86.12; a General Service customer using 500 CCF will increase \$33.13 from \$419.50 to \$452.63; and a Large General Service customer using 10,000 CCF will increase \$348.35 from \$6,283.21 to \$6,631.57.

PUBLIC NOTICE

NOTICE OF FINDING OF NO SIGNIFICANT IMPACT AND NOTICE OF INTENT TO REQUEST RELEASE OF FUNDS FOR THERO PROJECTS AND PROGRAMS STATEWIDE FEDERAL ASSISTANCE FOR HOMEOWNER RECOVERY PROGRAMS - SOUTHCENTRAL REGION OF LOUISIANA

Patrick Forbes, Executive Director Louisiana Division of Administration Office of Community Development (LA OGD) 817 N. Third Street, 6th Floor Baton Rouge, LA 70822 (225) 219-9600

Notice Issued: By February 18, 2022. These notices shall satisfy two separate but related procedural requirements for activities to be undertaken by the LA OGD.

REQUEST FOR RELEASE OF FUNDS

On or after March 8, 2022, the applicant must submit a request to the US Department of Housing and Urban Development (HUD) for the release of funds approved September 2021, appropriated as part of the Disaster Relief Supplemental Appropriations Act, 2022 (Public Law No. 117-43), published February 3, 2022 in Federal Register Docket No. FR-6035-N-01; to undertake programs known as Statewide Federal Assistance for Homeowner Recovery for the purpose of minor and major rehabilitation, reconstruction, buyout/condemnation, relocation and new construction of single-family residences, duplexes, one-to-four unit structures, mobile homes, mobile/manufactured (modular) housing units. The request at this time is for funding limited to certain categories; however, environmental review was completed covering activities with potential for all 64 parishes in the event of additional funding. This review request covers improvements of residential properties, specific address not yet identified, within the target area of the Southcentral Region of Louisiana (Acadia, Assumption, Avoyelles, Evangeline, Iberville, Jefferson Davis, Lafayette, Franklin, Grant, St. Landry, St. Martin, St. Mary, Terrebonne, Vermilion, and West Baton Rouge Parishes). The Tier 1 review has been prepared in accordance with the Environmental Assessment level of review per 24 CFR Part 58.26. The Tier 2 site specific reviews will cover the laws and authorities not addressed in the Tier 1 broad review including: flood insurance, food insurance, contamination and toxic substances, historic preservation, wild and scenic rivers and noise abatement. For each of the laws and authorities listed in the Tier 2 site-specific review, issues will be addressed, and mitigation measures, conditions or permits required will be implemented. The estimated total amount of HUD funding requested for this activity is \$24,110,333; proposed activity funding will also include previously released CDBG-HIT funds. Any non-HUD funded activities would be funded by private applicants/property owners and are unknown.

FINDING OF NO SIGNIFICANT IMPACT

The LA OGD has determined that the project will have no significant impact on the human environment. Therefore, an Environmental Impact Statement under the National Environmental Policy Act of 1969 (NEPA) is not required. Additional project information is contained in the Environmental Review Record (ERR) on file at the LA OGD Office at 817 N. Third Street, Baton Rouge, Louisiana and is available for examination or copied weekdays between 8:00 am to 4:00 pm. If you would like to request an electronic copy, please submit your request to Tina.Carrizo@la.gov.

PUBLIC COMMENTS

Any individual, group, or agency may submit written comments on the ERR via email to the LA OGD at Tina.Carrizo@la.gov. All comments received by March 7, 2022 will be considered by the office prior to the authorizing submission of a request for release of funds. All comments should specify which part of this notice they are addressing.

ENVIRONMENTAL CERTIFICATION

LA OGD certifies to HUD that Patrick Forbes, in his capacity as Executive Director, consents to accept the findings of the Federal Court in an earlier action brought in the author's responsibilities in relation to the environmental review process and that these responsibilities have been satisfied. HUD's approval of the certification satisfies its responsibilities under NEPA and related laws and authorities and allows the LA OGD to use Program Funds.

OBJECTIONS TO RELEASE OF FUNDS

HUD will accept objections to its release of funds and to the LA OGD's certification for a period of 30 days after submitting the anticipated release date or its actual receipt of the request, whichever is later, only if they are on one of the following bases: (a) the certification was not executed by the Certifying Officer or other officer of LA OGD approved by HUD; (b) LA OGD has certified a copy or label to make a decision or finding required by HUD regulations at 24 CFR Part 58; (c) the grant recipient or other participants in the project have committed funds, incurred costs or undertaken activities not authorized by 24 CFR Part 58 before approval of a release of funds by HUD; or (d) another Federal agency acting pursuant to 40 CFR Part 1504 has submitted a comment that the project is substantially in the status of environmental quality. Objections must be prepared and submitted via email in accordance with the required procedures at 24 CFR Part 58, Sec. 66.70) and shall be addressed to: DISR, Division Director of Housing and Urban Development at Disaster_Recovery@hud.gov. Potential objections should contact HUD via email (Disaster_Recovery@hud.gov) to verify the actual last day of the objection period.

NOTICE

Notice is hereby given, pursuant to article IV, section 21 (D)(1) of the Louisiana Constitution, that on January 31, 2022, Energy Louisiana, LLC ("ELL"), an electric and natural gas public utility having facilities to permit the local distribution of natural gas to residential, commercial, and municipal customers in East Baton Rouge Parish, filed with the Louisiana Public Service Commission ("LPSC" or "Commission") its Evaluation Report pursuant to its Gas Operations Rate Stabilization Plan ("RSP") for the last year ended September 30, 2021 ("TY 2021"), in accordance with LPSC Order No. U-03570.

ELL's Gas Operations RSP filing, if approved by the Commission as filed, will result in a rate increase of approximately \$3,852,067 annually, effective with the first billing cycle of May 2022. However, due to the approval of Louisiana Constitutional Amendment #2 in November 2021 affecting state taxes (Tax Legislation), ELL did not have adequate time to reflect the effects of the Tax Legislation in its annual RSP Evaluation Report due on or before January 31, 2022. ELL's RSP requires that the tax rate in effect at the time the Evaluation Report is filed shall be utilized. As such, ELL intends to supplement its Evaluation Report in April 2022 to include the effects of the Tax Legislation.

ELL's RSP filing for the TY 2021 that reflects an Earned Return on Equity ("ERE") of 2.83% and pursuant to the terms of the RSP, the ERE requires a rate adjustment by ELL. It is estimated that the rate increase will have the following effect on typical monthly customer bills: a Small General Service customer using 50 CCF will increase \$3.77, from \$62.35 to \$66.12; a General Service customer using 500 CCF will increase \$33.15, from \$419.08 to \$452.21; and a Large General Service customer using 10,000 CCF will increase \$346.29, from \$6,856.21 to \$7,202.50.

N O T I C E

Notice is hereby given, pursuant to Article IV, Section 21(D)(1) of the Louisiana Constitution, that on January 21, 2022, Entergy Louisiana, LLC ("ELL"), a public utility providing retail electric and gas services in certain parishes throughout the State of Louisiana, filed with the Louisiana Public Service Commission ("LPSC") its Application of Entergy Louisiana, LLC for Approval of the Withdrawal of Certain Tariffs and the Modification of Others ("Application"). Through the Application, ELL seeks to withdraw the following rate schedules and rate riders: AS-G, MS-G; CM-G; EAPS-G; EAPS-L; EER-G; EER-L; EOPF-L; ERDS-G; FTS-L; LAIPS-L; LCOP; MSS-G; MVER-G; MVER-L; OL-L; PM-G; and SPS-G. No customers are currently served on any of these 18 rate schedules and rate riders.

Additionally, ELL's Application proposes modifications to the following rate schedules and rate riders: GS-G; L-L; OBP; SMC-G; ALS-G; ALS-LED; CCL-L; DSL-L; HPSV-L; LED-SL-G; LED-SL-L; LSE-G; RLU-LED; SHL-G; and SHL-LED. The proposed revisions to these rate schedules and rate riders are reflected in the filing to the LPSC. The majority of the proposed modifications are clarifications to tariff terms that do not have a direct effect on rates, with the exception of fees associated with a limited number of new lighting rate categories.

For questions and comments regarding ELL's filing, please call the LPSC toll free at (800) 256-2397. Additionally, the filing, including its attachments may be viewed in the Records Division of the LPSC at the following address:

Notice of Violation/Public Notification of Non-Compliance
Disinfectants/Disinfection By-Products Rule
(TTHMs and HAA5) MCL Violation
Community Water System
Lake St. John Waterworks District 1
PWS ID #LA 1029006
Concordia Parish
318-757-9853**

The Lake St. John Waterworks District 1 is currently in violation of the maximum contaminant level (MCL) or haloacetic acids as set forth by the State (Part XI) of the Louisiana State Sanitary Code (LACS1-X0) and the Federal Primary Drinking Water Regulation (40 CFR part 141).

The United States Environmental Protection Agency (EPA) and the Louisiana Department of Health (LDH) set drinking water standards and requires the disinfection of drinking water. Where disinfection is used in the treatment of drinking water, disinfectants combine with naturally occurring organic and inorganic matter present in water to form chemicals called disinfection byproducts (DBPs). EPA and LDH set standards for controlling the level of disinfectants and DBPs in drinking water, including trihalomethanes (THMs) and haloacetic acid (HAAs). Some people who drink water containing THMs in excess of the MCL, over many years may experience problems with their liver, kidneys, or central nervous system and may have an increased risk of getting cancer. Some people who drink water containing HAAs in excess of the MCL over many years may have an increased risk of getting cancer.

In December, 1998, EPA set enforceable drinking water standards for THMs at 80 parts per billion (ppb) and for HAAs at 60 parts per billion (ppb) to reduce the risk of cancer or other adverse health effects. Compliance with the THMs and HAAs standards are determined by calculating a locational running annual average (LRAA) of quarterly THMs and HAAs sample results. Compliance calculations performed for the fourth quarter of 2021 show that the system's current HAAs LRAA is 88 ppb at DBP02-5861 HWY 568; thus the system is currently in violation of the HAAs standards.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses).

This is not an emergency. If it had been, you would have been notified immediately. EPA and LDH do not consider this violation to have any serious adverse health effects on human health as a result of short-term exposure; however, continued long-term exposure to THMs and HAAs levels above the standard (e.g., 20 years of exposure) has the potential to have serious adverse effects on human health.

NOTICE

Notice is hereby given, pursuant to article IV, section 21 (D)(1) of the Louisiana Constitution, that on January 31, 2022, Entergy Louisiana, LLC ("ELL"), an electric and natural gas public utility having facilities to permit the local distribution of natural gas to residential, commercial, and municipal customers in East Baton Rouge Parish, filed with the Louisiana Public Service Commission ("LPSC" or "Commission") its Evaluation Report pursuant to its Gas Operations Rate Stabilization Plan ("RSP") for the last year ended September 30, 2021 ("TY 2021"), in accordance with LPSC Order No. U-35370.

ELL's Gas Operations RSP filing, if approved by the Commission as filed, will result in a rate increase of approximately \$3,852,067 annually, effective with the first billing cycle of May 2022. However, due to the approval of Louisiana Constitution Amendment #2 in November 2021 affecting State tax rates ("Tax Legislation"), ELL did not have adequate time to reflect the effects of the Tax Legislation in its annual RSP Evaluation Report due on or before January 31, 2022. ELL's RSP requires that the tax rate in effect at the time the Evaluation Report is filed shall be utilized. As such, ELL intends to supplement its Evaluation Report in April 2022 to include the effects of the Tax Legislation.

ELL's RSP filing for the TY 2021 Test Year reflects an Earned Return on Equity ("EROE") of 2.65% and pursuant to the terms of the RSP, this EROE requires a rate adjustment by ELL. It is estimated that the rate increase will have the following effect on typical monthly customer bills: a Small General Service customer using 50 CCF will increase \$3.77, from \$52.35 to \$56.12; a General Service customer using 500 CCF will increase \$33.15, from \$419.06 to \$452.21; and a Large General Service customer using 10,000 CCF will increase \$346.26, from \$6,285.21 to \$6,631.47.

For questions and comments, please call the LPSC toll free at (800) 256-2397.

Additionally, the Company's filing and its attachments may be viewed in the Records Division of the LPSC at the following address:

Taliban reopen universities for Afghan women in 6 provinces

Tameem Akhtar
ASSOCIATED PRESS

ISLAMABAD — The Taliban on Wednesday said they have reopened public universities for women students in six of Afghanistan's 34 provinces, a move marking a major concession to international demands by the country's new rulers.

Since they swept into power in mid-August, the international community has watched to see whether the Taliban will impose the same harsh measures as during their 1990s rule of Afghanistan, including banning girls from education and women from the workplace and public life.

The Taliban-run culture and information ministry said Wednesday that public universities in the provinces of Nangarhar and Kandahar were now open for women in what it described as a staggered process expected to see all students — men and women — eventually return to university.

Later in the day, the Taliban spokes-

man for the ministry of higher education, Ahmad Taqqi, said public universities also reopened Wednesday for women in four more provinces — Helmand, Farah, Nimroz and Laghman.

The six provinces have warmer climates than the rest of Afghanistan, where the winters are bitterly cold, which the Taliban says is the reason they

are the first to reopen. Men will attend classes in the morning and women in the afternoon, aligning with a gender-segregated system under the Taliban.

Earlier this week, Abdul Baqi Haqqani, the Taliban-appointed education minister, said that public universities elsewhere in Afghanistan, including the University of Kabul, would reopen for

both men and women on Feb. 26. "All instructors and officials are advised to concentrate on their responsibilities and provide the required facilities for the students," Haqqani said in a recorded video clip on Sunday.

The United Nations mission in Afghanistan welcomed his announcement, calling it "important for Afghanistan" in a tweet Tuesday. "So crucial that every young person has equal access to education."

On Wednesday, Taliban-appointed culture and information minister, Khalullah Khairkhwa, visited the Kandahar University and said that "modern and Islamic education simultaneously can lead a country to prosperity."

Since their takeover, the Taliban have come under heavy fire for denying girls and women education. Reopening of public universities would be their first concession. The Taliban have also promised that all girls will be back in school by the end of March at the start of the Afghan new year.

NOTICE

Notice is hereby given, pursuant to article IV, section 21 (D)(1) of the Louisiana Constitution, that on January 31, 2022, Entergy Louisiana, LLC ("ELL"), an electric and natural gas public utility having facilities to permit the local distribution of natural gas to residential, commercial, and municipal customers in East Baton Rouge Parish, filed with the Louisiana Public Service Commission ("LPSC" or "Commission") its Evaluation Report pursuant to its Gas Operations Rate Stabilization Plan ("RSP") for the test year ended September 30, 2021 ("TY 2021"), in accordance with LPSC Order No. U-35370.

ELL's Gas Operations RSP filing, if approved by the Commission as filed, will result in a rate

increase of approximately \$3,852,067 annually, effective with the first billing cycle of May 2022. However, due to the approval of Louisiana Constitutional Amendment #2 in November 2021 affecting State tax rates ("Tax Legislation"), ELL did not have adequate time to reflect the effects of the Tax Legislation in its annual RSP Evaluation Report due on or before January 31, 2022. ELL's RSP requires that the tax rate in effect at the time the Evaluation Report is filed shall be utilized. As such, ELL intends to supplement its Evaluation Report in April 2022 to include the effects of the Tax Legislation.

ELL's RSP filing for the TY 2021 Test Year reflects an Earned Return on Equity ("EROE") of 2.63% and pursuant to the terms of the RSP, this EROE requires a rate adjustment by ELL. It is estimated that the rate increase will have the following effect on typical monthly customer bills: a Small General Service customer using 50 CCF will increase \$3.77, from \$52.35 to \$56.12; a General Service customer using 500 CCF will increase \$33.15, from \$419.06 to \$452.21; and a Large General Service customer using 10,000 CCF will increase \$346.26, from \$6,285.21 to \$6,631.47.

PUBLIC NOTICE NOTICE

Notice is hereby given, pursuant to Article IV, Section 21(D)(1) of the Louisiana Constitution, that on January 31, 2022, Entergy Louisiana, LLC ("ELL"), a public utility providing retail electric and gas service in certain parishes throughout the State of Louisiana, filed with the Louisiana Public Service Commission ("LPSFC") its Application for Approval of the Withdrawal of Certain Tariffs and the Modification of Others ("Application"). Through the Application, ELL seeks to withdraw the following rate schedules and rate riders: AS-G; ASPS-G; CM-G; EAP-S; EAP-L; EER-G; EER-L; EDPFL; EDRS-G; FTS-L; LAIPSL; LCOF; MSS-G; MYER-G; MYER-L; OL-L; PM-G; and SPS-G. No customers are currently served by any of these 18 rate schedules and rate riders. Additionally, ELL's Application proposes modifications to the following rate schedules and rate riders: US-G; L-L; OBP; SMC-G; ALS-G; ALS-LED; CCL-L; DSL; LSPVL; LED-SL-G; LED-SL-L; LS-K; RL1-L; SH-G; and SILL-LED. The proposed revisions to these rate schedules and rate riders are reflected in the filing to the LPSFC. The majority of the proposed modifications are clarifications to tariff terms that do not have a direct effect on rates, with the exception of fees associated with a limited number of new lighting rate categories. For questions and comments regarding ELL's filing, please call the LPSFC toll free at (800) 256-2397. Additionally, the filing, including its attachments may be viewed in the Records Division of the LPSFC at the following address: Records Division 602 N. 5th Street, 12th Floor

PUBLIC NOTICE NOTICE

Notice is hereby given, pursuant to article IV, section 21 (D)(1) of the Louisiana Constitution, that on January 31, 2022, Entergy Louisiana, LLC ("ELL"), an electric and natural gas public utility having facilities to permit the local distribution of natural gas to residential, commercial, and municipal customers in East Baton Rouge Parish, filed with the Louisiana Public Service Commission ("LPSFC") its Evaluation Report pursuant to its Gas Operations Rate Stabilization Plan ("RSP") for the test year ended September 30, 2021 ("TY 2021"), in accordance with LPSFC Order No. U-3570. ELL's Gas Operations RSP filing, if approved by the Commission as filed, will result in a rate increase of approximately \$3,582,067 annually, effective with the first billing cycle of May 2022. However, due to the approval of Louisiana Constitutional Amendment #2 in November 2021 affecting State tax rates ("Tax Legislation"), ELL did not have adequate time to reflect the effects of the Tax Legislation in its annual RSP Evaluation Report due on or before January 31, 2022. ELL's RSP requires that the tax rate in effect at the time the Evaluation Report is filed shall be utilized. As such, ELL intends to supplement its Evaluation Report in April 2022 to include the effects of the Tax Legislation. The ELL's RSP filing for the TY 2021 Test Year reflects an Estimated Return on Equity ("EROE") of 2.63% and pursuant to the terms of the RSP, this EROE requires a rate adjustment by ELL. It is estimated that the rate increase will have the following effect on typical monthly customer bills: a Small General Service

Public Notices

for the last year ended September 30, 2021 ("TV 2021"), in accordance with LSPSC Order No. U-35370.

ELL's Gas Operations RSP filing, if approved by the Commission as filed will result in a rate increase of approximately \$3,862,097 annually, effective with the first billing cycle of May 2022. However, due to the approval of Louisiana Constitutional Amendment #2, November 2021 affecting State tax rates ("The Legislation"), ELL did not have adequate time to reflect the effects of the Tax Legislation in its annual RSP Evaluation Report due on or before January 31, 2022. ELL's RSP requires that the rate take effect at the time the Evaluation Report is filed with the Commission. As such, ELL intends to supplement its Evaluation Report for April 2022 to include the effects of the Tax Legislation.

ELL's RSP filing for the TV 2021 2nd Year reflects an Earned Return on Equity ("EROE") of 2.873% and pursuant to the terms of the RSP, this EROE requires a rate adjustment by ELL. It is estimated that the rate increase will have the following effect on typical monthly customer bills for Small General Service customer using 50 CCP (Customer Use of 5000 kWh) to \$58.12, a General Service customer using 5000 CCP will see a \$33.15, from \$419.05 to \$452.21, and a Large General Service customer using 10,000 CCP will see a \$38.26, from \$5,285.21 to \$5,323.47.

BOYS SOCCER PLAYOFFS | DENHAM SPRINGS 2, ST. AMANT 1, OVERTIME

Denham Springs' Axel Agurcia prepares to kick the game-winning goal in overtime as St. Amant keeper Dillon Staal reacts during Saturday's Division I playoff match.

DENHAM SPRINGS EDGES ST. AMANT IN OVERTIME

ROB DEARMOND The Livingston Parish News ST. AMANT — The Division I regional playoff match between Denham Springs and St. Amant delivered a little extra didn't hurt. Clay Fontont scored a goal with the clock stopped in regulation to send the contest to overtime, and Axel Agurcia scored the game-winner late in the first extra period, lifting the No. 12-seeded Yellow Jackets to a 2-1 win over No. 5 St. Amant at The Pit on Saturday. "I hoped it was going to be a lot less stressful, but you've got to give credit to St. Amant," Hilliard said after the Yellow Jackets advanced to the quarterfinals for the second straight season. "That's one of the top programs in the state, one of the top coaches in the state. That's the best goalkeeper in the state. They're littered with great players across the field. We have all the respect in the world for (St. Amant coach) Adrian (Garcia) and the product he puts on the field. He does a really good job. He makes it really tough to play against. It was wild."

PARISH SOCCER PLAYOFF RESULTS

Table with 2 columns: Division and Results. Includes Girls Division I (Hahnville 3, Live Oak 1) and Boys Division I (Denham Springs 6, Hahnville 0).

when Denham Springs' Alex Williams hit a booming kick to Agurcia, who corralled the ball and raced down the left side. As he approached the goal, St. Amant keeper Dillon Staal closed in to make a play, leaving the net open for Agurcia to score the game-winner from about 10 yards out. "He's a really good goal keeper, but I had my head up before I kicked it, so I just placed it, and it went back in," Agurcia said. In the second overtime period, St. Amant's Leonardo Fuentes missed a shot wide left, and Michal Cretinin's free kick from 21 yards out bounced off the football crossbar just above the goal. "We had a miscue," Hilliard said. "Our back line decided they wanted to hold the goal line and allow St. Amant's players to crowd in front of the keeper. I guess I haven't been clear enough that that's not acceptable. They needed to hold higher up to give Tate (Fuentes) space to come out and make a play on the ball. We didn't, so we got fortunate that the ball was put a little over, but Tate had it covered."

Denham Springs was unable to convert on the ensuing free kick but hit the equalizer when another free kick opportunity presented itself with the clock stopped. Hayden Baio lofted the kick to the front of the goal, where Fontont punched it in at point-blank range past Staal to tie the contest at 1-1. "We needed a goal. We needed it fast. Little time," Baio said. "I saw Clay. Clay's done it before, so [I] just hit the ball and hope he can do it." Said Fontont of the goal: "Going into the free kick, we had the pressure. We had been holding them for 10 minutes in their half, and I knew that I wanted it more than most of them in there, so it came right to me, and I just put it in." David's goal with roughly 22 minutes left in regulation put the Gators ahead 1-0. "Freshman year, we got knocked out of the playoffs by St. Amant right here in The Pit, and when they scored that first one, I was having flashbacks," Fontont said. "I'm really wild."

David hit the side of the net shortly after. "We expected a different tactical set-up from St. Amant than what we saw, so we were hoping that we made an adjustment anticipating what their adjustment was going to be and thought we might be able to jump out to an early lead, and they didn't," Hilliard said. "They defended and played the way they've played all season. We thought they were going to do a little tweak specifically to stop Axel, but they didn't. They stayed true to the way they've always played, so then we had to kind of revert away from the tactical tweak we made." Blaze Restivo also missed for the Yellow Jackets, while St. Amant's Aldo Patron hit a corner kick directly to Fuentes. Baio had a shot off the crossbar, while St. Amant's Easton Jarreau missed wide on a shot. David and Fontont received yellow cards just before halftime. "We said they don't want to play a three or four goal game with us," Hilliard said. "They wanted to play a one or two, and three would be the absolute max amount of goals total for both teams that they would feel comfortable with."

The Yellow Jackets will host No. 4 Alexandria, a 5-1 winner over Captain Shreve, in the quarterfinals. "It was far from our best performance, but it's big for these guys to understand that even in a day where we put a C-plus product from what we expect from our guys on the field, we were able to pull out a win against one of the top programs in the state," Hilliard said. "That's huge for us as far as our confidence and our understanding of what we can do. When we play bad, we're still in every single game because of some of the talented, ridiculous players we have. We have 10 (Agurcia) on the team, and we have 11 (Fontont), and we have 3 (Blaze Restivo)."

"That being said, we've got to play better." The match was tied at 1-1 at the end of regulation, forcing a pair of 10-minute overtime periods. Neither team made a dent in the first overtime until late,

LEGAL NOTICE

NOTICE

Notice is hereby given, pursuant to article IV, section 21 (D)(1) of the Louisiana Constitution, that on January 31, 2022, Entergy Louisiana, LLC ("ELL"), an electric and natural gas public utility having facilities to permit the local distribution of natural gas to residential, commercial, and municipal customers in East Baton Rouge Parish, filed with the Louisiana Public Service Commission ("LPSC" or "Commission") its Evaluation Report pursuant to its Gas Operations Rate Stabilization Plan ("RSP") for the test year ended September 30, 2021 ("TY 2021"), in accordance with LPSC Order No. U-35370.

ELL's Gas Operations RSP filing, if approved by the Commission as filed, will result in a rate increase of approximately \$3,852,067 annually, effective with the first billing cycle of May 2022. However, due to the approval of Louisiana Constitutional Amendment #2 in November 2021 affecting State tax rates ("Tax Legislation"), ELL did not have adequate time to reflect the effects of the Tax Legislation in its annual RSP Evaluation Report due on or before January 31, 2022. ELL's RSP requires that the tax rate in effect at the time the Evaluation Report is filed shall be utilized. As such, ELL intends to supplement its Evaluation Report in April 2022 to include the effects of the Tax Legislation.

ELL's RSP filing for the TY 2021 Test Year reflects an Earned Return on Equity ("EROE") of 2.63% and pursuant to the terms of the RSP, this EROE requires a rate adjustment by ELL. It is estimated that the rate increases will have the following effect on typical monthly customer bills: a Small General Service customer using 50 CCF will increase \$3.77, from \$52.35 to \$56.12; a General Service customer using 500 CCF will increase \$33.15, from \$419.06 to \$452.21; and a Large General Service customer using 10,000 CCF will increase \$346.26, from \$6,285.21 to \$6,631.47.

NOTICE

Notice is hereby given, pursuant to article IV, section 21 (1) of the Louisiana Constitution that on January 31, 2022, Entergy Louisiana, LLC ("ELL"), an electric and natural gas public utility having facilities to permit the local distribution of natural gas to residential, commercial and municipal customers in East Baton Rouge Parish, filed with the Louisiana Public Service Commission ("LPSC") its Evaluation Report pursuant to its Gas Operations 2020 Rate Review Plan ("RRP") for the year ended December 30, 2021 ("R2021"), in accordance with LPSC Order No. U-35370.

ELL's Gas Operations RRP filing, if approved by the Commission as filed, will result in a rate increase of approximately \$3,822,067 annually, effective with the first billing cycle of May 2022. However, due to the approval of Louisiana Constitutional Amendment #2 in November 2021 affecting State tax rates on which such tax is levied, ELL did not have adequate time to reflect the effects of the Tax Legislation in its annual RRP Evaluation Report due on or before January 31, 2022. ELL's RRP requires that the tax rate in effect at the time the Evaluation Report is filed shall be used. As such, ELL intends to supplement the RRP filing for the 2021 Test Year reflects an Earned Income Tax Credit ("EITC") of 26%, and pursuant to the terms of the RRP, the EITC requires a rate adjustment by ELL. It is estimated that the rate increase will have the following effect on typical monthly customer bills: a Small General Service customer using 30 CCF will increase \$3.77, from \$32.35 to \$36.12; a General Service customer using 50 CCF will increase \$33.15, from \$49.08 to \$82.23; and a Large General Service customer using 10,000 CCF will increase \$34,334.36, from \$6,285.21 to \$40,619.57.
