NOTES:

(A) ADJUSTMENTS DEFINED IN ATTACHMENT C TO THIS RIDER FRP (SEE SECTION 4)

(B) THE TAX RATE IN EFFECT AT THE TIME THE EVALUATION REPORT IS FILED SHALL BE UTILIZED SEE SCHEDULE MD 1

Page 163.97.35

ENTERGY LOUISIANA, LLC EVALUATION PERIOD ADJUSTMENTS

The actual (per book) data for the Evaluation Period, as reflected in Attachment B, shall be adjusted to reflect the following:

1. Special Rates

- A) Present rate revenue shall be adjusted to reflect, on an annualized basis, the Rate Adjustments in effect at the end of the Evaluation Period under this Rider FRP<u>, as adjusted for non-recurring items</u>.
- B) The rate base, revenue and expense effects associated with any riders, or other rate mechanisms, that ELL may have in effect during the Evaluation Period which recover specific costs including Section 2.C.2(a) of this Rider FRP are to be eliminated.

2. Interest Synchronization

All Evaluation Period interest expenses are to be eliminated and replaced with an imputed interest expense amount equal to the Evaluation Period rate base multiplied by the weighted embedded cost of debt for the Evaluation Period determined in accordance with Attachment D.

3. Income Taxes

All state and federal income tax effects including 1) adjustments to taxable income, 2) adjustments to current taxes, 3) provisions for deferred income tax (debit and credit), and 4) accumulated provision for deferred income tax (debit and credit) shall be adjusted or eliminated, as appropriate, to comport with the following principles:

- A) Effects associated with other adjustments set out in this Attachment C shall similarly and consistently be adjusted;
- B) All effects associated with the difference in the timing of transactions, where the underlying timing difference is eliminated, shall also be eliminated;
- C) The corporate state and federal income tax laws legally in effect on the date an Evaluation Report is filed under this Rider FRP shall be reflected in the calculation of all income tax amounts; and
- D) Tax effects normally excluded in prior Commission Orders regarding ELL for ratemaking purposes shall be eliminated.
- E) ADIT balances for those items for which the book balance of the associated rate base or expense item is adjusted for ratemaking purposes to ensure that the ADIT balances are synchronized to the related rate base/expense items.

4. Specific Ratemaking Adjustments

The following adjustments shall be made for each Evaluation Period to the extent they remain applicable:

- A. Fuel Adjustment revenues and purchased power expense shall be adjusted in accordance with LPSC Order No. U-16945 related to ELL's Grand Gulf allocation, LPSC Order U-32328-A and any future orders of the LPSC.
- B. Decommissioning expense will be based on the latest approved cost estimates, escalation rates, earnings rates and the depreciable life of Waterford 3 and River Bend.

- C. Depreciation expense shall be based on the latest approved Louisiana depreciation rates including a 60-year life for River Bend.
- D. The State Corporate Franchise Tax shall be proformed to reflect the State Corporate Franchise Tax, consistent with the terms of LPSC Order <u>No'sNos</u>. S-28919 and U-21453 (Subdocket J).
- E. Adjustments <u>shall be made</u> to remove the River Bend Deregulated Asset Plan ("DAP") cost effects from rate base and expenses <u>consistent with Ordering Paragraph 4 of LPSC Order U-17282-K</u>.
- F. Adjustment <u>shall be made</u> to remove the 30% unregulated River Bend cost effects from rate base and expense.
- G. Adjustment <u>shall be made to the</u> Louisiana retail revenue requirement for the DAP revenue requirement.
- H. Cash working capital shall be determined by the most recently approved lead/lag study.
- I. Nelson Rail Spur teshall be included in rate base and expense as if owned by ELL.
- J. The actual-prudently incurred external costs to achieve the Business Combination's customer benefits ("CTABs") that have been or will be incurred during the period January 1, 2014 through December 31, 2015 shall be deferred as a regulatory asset and amortized over a ten-year period beginning with the first billing cycle following the implementation of the ELL FRP for the 2014 Evaluation Period. The annual amortization of the CTABs shall be treated as an FRP revenue requirement subject to the bandwidth earnings test. The amount of CTABs to be amortized will not exceed \$25 million, and CTABs will only include actual, prudently-incurred, external ELL, EGSL or ELP costs. CTABs will not include any costs associated with review by the Council of the City of New Orleans of the Business Combination, the Algiers asset transfer, or any other costs incurred by or in connection with proceedings before the Council. Carrying charges on the CTABs shall not be accrued.
- K. To the extent that there are additional FERC-ordered refunds and/or changes in rates pertaining to amounts billed ELL applicable to Grand Gulf, System Energy Resources, Inc. (SERI), ELL shall reflect a corresponding adjustment to annualize the associated retail revenue requirement effects. These adjustments, if made during theto term of this FRP-renewal, shall be dollar-for-dollar outside the bandwidth provisions of this Rider FRP and will include any retroactive effects, including refunds or credits.
- L. Concurrent with the effective date of this Rider FRP, the FRP rate adjustments shall be redetermined for outside the bandwidth components of the FRP, including the ACM, TRAM/TRM, DRM, MCRM, and TAM, which shall also reflect a true-up consistent with the uninterrupted application of these provisions. To the extent that the effective date of this Rider falls after September 2024, the FRP rate adjustments shall be grossed up such that the annualized revenue requirements are recovered in their entirety through the rate effective period.

5. Reclassifications

- A) Revenues associated with ELL's rates in the LPSC Retail or FERC (Sales for Resale) jurisdictions, but included in Other Electric Revenue on a per book basis (Attachment B, Page 3, Line 6), shall be reclassified to the appropriate jurisdictional rate schedule revenue category.
- B) Costs not allowable for ratemaking purposes shall be removed by adjustment from the Evaluation Period cost data. Likewise, costs that are allowed, but recorded below the utility operating income line, shall be included in the Evaluation Period cost data through appropriate reclassification adjustments. These adjustments shall include, but are not limited to: 1) the reclassification of below-the-line interest expense associated with customer deposits and 2) interest income related to ESI and EOI and, 3) Letter of Credit Fees related to MISO.

6. Out-of-Period Items

Except with respect to expenses and revenues arising from a Federal Energy Regulatory Commissionjurisdictional tariff, expenses and revenues recorded in any Evaluation Period that are related to transactions occurring prior to 2005 under the Legacy Entergy Louisiana, LLC company and prior to 2004 under the Legacy Entergy Gulf States Louisiana, L.L.C. company shall be eliminated by adjustment from the Evaluation Period cost data. This shall include any associated tax adjustments.

7. Environmental Costs

To maintain neutrality in the recovery of the costs recovered via the Environmental Adjustment Clause ("EAC"), the Company shall make an adjustment to remove the Account 447 revenue associated with its affiliate-related billings of EAC costs.

8. Ratemaking Treatment with Respect to Guaranteed and Contingent Credits Arising from the Business Combination in Docket U-33244

In connection with the stipulation approved in LPSC Order, U-33244-B, ratemaking treatments with respect to Guaranteed and Contingent Credits were approved and shall be reflected in the calculation included on Attachment F Line 31-via the, as an Extraordinary Cost-Provision/Credit.

9. Other

In addition to Adjustments 1-8 above, there may from time to time be special cost or rate effects that occur during an Evaluation Period that require adjustment of the Evaluation Period cost data. Nothing in this Rider FRP shall preclude any Party from proposing such adjustments. Such that Other adjustments required to be made to the evaluation period data are associated with costs embedded within Legacy FRP rates, and outside of any true ups or adjustment provisions already provided for within this rider. Other adjustments shall be deemed to be made on a prospective basis through the ELL FRP, unless otherwise authorized by the LPSC.

ENTERGY LOUISIANA, LLC BENCHMARK RATE OF RETURN ON RATE BASE

NOTES:

- (1) Amounts at the end of the Evaluation Period, except Short-Term Debt which is the 13-month average, as adjusted for refinancing activities that occur prior to implementation of the Evaluation Report. All Long-Term Debt issues shall reflect the balance net of a) unamortized debt discount, premium, and expense; b) gain or loss on reacquired debt; and c) any adjustments required per Attachment C. All Preferred Stock issues shall reflect the balance net of discount, premium and capital stock expense. Common equity and preferred equity shall be adjusted for the net unamortized balance of gains and losses on reacquired preferred stock. Amounts related to Securitization financing and interim storm financing that was the subject of Order No. U-35762 will be eliminated.
- (2) Each Capital Amount divided by the Total Capital Amount. However, if the Common Equity Ratio exceeds the weighted average common equity ratio of all five Entergy Operating Companies plus 2%, the Common Equity Capital Amount shall be reduced so that the Common Equity Ratio is equal to the weighted average common equity ratio of all five Entergy Operating Companies plus 2%. Any resulting reduction in the Common Equity Capital Ratios (%) shall then be allocated to Short-Term Debt, Long-Term Debt and Preferred Equity on a pro rata basis based on the corresponding Capital Amounts.
- (3) Annualized cost of Long-Term Debt and Preferred Equity at the end of the Evaluation Period, as adjusted for refinancing activities that occur prior to implementation of the Evaluation Report, divided by the corresponding Capital Amount. The Short-Term Debt Cost Rate is the 13-month average of the Short-Term Debt interest rates on the last day of each month of the Evaluation Period and the immediately preceding December 31. The Long-Term Debt Cost Rate shall include a) annualized amortization of debt discount premium, and expense; b) annualized gain or loss on reacquired debt; and c) any adjustments required per Attachment C. The Common Equity Cost Rate shall be the Evaluation Period Cost Rate for Common Equity (EPCOE) determined in accordance with Attachment E.
- (4) The components of the Benchmark Rate of Return on Rate Base (BRORB) column are the corresponding Cost Rates multiplied by the associated Capital Ratio. The BRORB is the sum of the components so determined and expressed as a percent to two decimal places (XX.XX%).

ENTERGY LOUISIANA, LLC EVALUATION PERIOD COST RATE FOR COMMON EQUITY PROCEDURE

A. EVALUATION PERIOD COST RATE FOR COMMON EQUITY

The EPCOE applicable for any Evaluation Report pursuant to this Rider FRP shall be <u>9.50x.xx</u>% This EPCOE shall remain in effect until a new procedure for determining the EPCOE is established and implemented in connection with any extension of this Rider FRP, or until the EPCOE is superseded or new base rates are duly approved and implemented, as provided in Section 6 of this Rider FRP.

Entergy Louisiana, LLC

Update following outlook change to stable

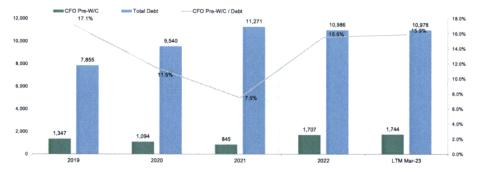

Summary

Entergy Louisiana, LLC's (ELL, Baa1 stable) credit profile is supported by 1) a constructive formula rate plan regulatory framework in Louisiana, where utilities typically generate predictable earnings near the level of their authorized ROEs, 2) a run-rate financial profile expected to generate cash flow to debt ratios in the high teens range and 3) the state's track record of providing storm cost recovery via securitization.

ELL's credit profile is constrained by 1) environmental risks associated with its concentration in a storm prone service territory, where hurricanes caused nearly \$5.0 billion of damage at the utility in 2020 and 2021, 2) social risks around customer, political and regulatory relationships amid inflationary pressures and annual rate increases to recover capital investments, 3) weak financial metrics due to outstanding storm cost recovery proceedings.

Exhibit 1

Historical CFO pre-WC, Total Debt and CFO pre-WC to debt

The downgrade threshold indicated above is one of several factors that could lead to a downgrade if the metric is below this level for an extended period of time. Source: Moody's Investors Service

Credit strengths

- » Supportive and consistent regulatory framework oversees over \$15 billion of rate base
- » Formula rate plan enhances earnings predictability, with financial improvement expected in 2023

This report was republished on 20 July 2023 with a corrected ratio of CFO pre-WC to debt of 15.5% in 2022.

» Growing demand due to customer electrification efforts

Credit challenges

- » Storm-prone service territory
- » Potential for customer, political or regulatory pushback in its next general rate case filing
- » High exposure (i.e., around two-thirds of historical demand) to commercial and industrial customers

Rating outlook

ELL's stable outlook reflects the company's improving financial metrics, supported by a formulaic rate structure that underpins its rate making and regulatory environment. Its current formulaic rate plan (FRP) allows the company to adjust costs on an annual basis and lends itself to a generally stable and predictable financial profile, absent storm events. An upcoming general rate proceeding is expected to yield results consistent with the current FRP parameters and support an ongoing CFO pre-WC to debt ratio of at least 18%.

Factors that could lead to an upgrade

ELL could be upgraded if CFO pre-WC to debt levels were to be at least 21% on a sustainable basis and if the LPSC grants more forward-looking cost recovery mechanisms, including more ample storm cost recovery assurances (e.g., higher storm reserves).

Factors that could lead to a downgrade

ELL could be downgraded if the regulatory relationship deteriorates, if its ratio of CFO pre-WC to debt were to be at or below 18% on a sustained basis or if the company is no longer able to fully recover storm costs on a reasonably timely basis.

Profile

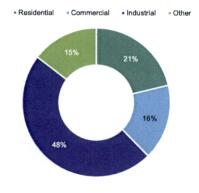

Entergy Louisiana, LLC (ELL, Baa1 stable) is a vertically integrated utility regulated by the Louisiana Public Service Commission (LPSC), serving around 1.1 million electric and gas customers in Louisiana. ELL is comprised of two legacy Entergy utilities: the former Entergy Louisiana and Entergy Gulf States Louisiana (EGSL).

ELL, Entergy Corporation's (Entergy, Baa2 negative) largest utility subsidiary, is expected to contribute roughly 40-45% of the parent company's EBITDA over the next few years. ELL's revenue is typically more weighted toward industrial customers, as seen in Exhibit 3.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the issuer/deal page on https://ratings.moodys.com for the most updated credit rating action information and rating history.

Exhibit 3

ELL's energy sales are heavily weighted toward industrial customers Electric energy sales for ELL in 2022

Detailed credit considerations

Louisiana's formulaic rate framework is credit supportive

ELL's fundamental rate construct consists of formula rate plans (FRPs), which generally include well defined parameters for how a utility's revenue requirement is determined and instituted on an annual basis. This provides a good degree of clarity for how future rates will be set and utility operating and capital costs are recovered. FRPs helps to reduce regulatory lag and increase the predictability of future cash flow and financial metrics by incorporating these costs into rates without the need for lengthy or contentious periodic general rate case proceedings. These features allow for higher predictability and consistency of the rate making process, as well as contributing to the stability of earnings and cash flow.

ELL's current FRP is expiring in August of 2024 and, in order to extend the FRP framework, will first have to file a more traditional general rate case. We incorporate an expectation that ELL will file a general rate case for new rates to go into effect toward the end of 2024 and that the company will also request an FRP extension for future rate making. We will view the general rate proceeding to be a test of the strength of ELL's regulatory relationships in the state, following a contentious storm cost securitization process in December 2022 and January 2023.

Despite negative rhetoric from the LPSC, full storm cost securitization was finally approved

ELL experienced severe hurricanes in 2020 and 2021, which totaled nearly \$5.0 billion of collective storm costs and created the potential for political intervention into rate making, in order to shield customers from higher utility bills. After Hurricane Ida in 2021, we cited the risk that customer relations and regulatory relationships could be pressured given the high cost of repairs, difficult economic circumstances and utility bill affordability concerns facing the company's customers.

These risks seemed to come to a head in December 2022, when the LPSC declined to vote for financing authority regarding the final \$1.6 billion of storm costs that ELL was seeking to securitize. That same month, an LPSC commissioner posited that some of Entergy's restoration costs for Hurricane Ida were imprudent and should not be recovered through storm cost securitization (see our 10 January Issuer Comment Entergy's regulatory and financial risks increase with Louisiana regulator's motion to clarify subsidiary's refunds for more details).

Strained relationships were also apparent in the ultimate January 2023 storm cost securitization proceeding. During the January 2023 hearing, multiple state commissioners expressed their displeasure with the company's approach to recovery and implemented roughly \$100 million of customer savings (i.e., up-front monetization of tax benefits that ELL expects to accrue over the life of the bond issuance) before approving the last \$1.5 billion of storm cost recovery. While this is not a material amount compared to the all-in securitization, it does highlight potential future challenges to storm cost securitization in the state.

However, the LPSC's ultimate decision was also in accordance with historical precedent, where ELL is able to recover the full costs of severe storms. The willingness of politicians and regulators in Louisiana to balance stakeholder interests and support the utility in times of duress is an important risk mitigant. This basic recovery premise underpins the credit quality of the company.

We recognize that storm events create arduous circumstances for customers and state politicians, which have to be navigated by utilities and regulators. We also believe that storm cost securitization remains one of the best tools available to address abrupt, high-cost events for utilities and their stakeholders, since it balances the need for low cost funding and minimal customer bill impact, while also maintaining the utility's financial integrity and the regulatory compact.

Credit positioning reflects storm exposure

The combination of Hurricanes Laura, Delta, Zeta and Ida over a two-year period was unprecedented in Louisiana and the nearly \$5.0 billion of storm damage they caused to ELL's asset base, represented over 35% of ELL's approximately \$14 billion in total rate base at the time. While we have long cited the company's geographic footprint as a risk for ongoing storm activity, the frequency and severity of these storms was the most on record, and reflects a higher risk operating environment for ELL, compared to most utilities in the US. Due to the physical effects of climate change and the capital required to bolster infrastructure and recover from damaging events, we require ELL's financial profile to be more robust than the average utility, in order to maintain a given rating. In the exhibit below, we show a group of utilities that face very high exposure to environmental risks and compare their size, as measured by net PP&E, debt burden, expected CFO pre-WC to debt over the near-term (per each company's latest credit opinion) and financial thresholds. ELL is rated lower than most of the cohort and has an upgrade threshold that is comparable to some of the higher rated peers, which reflects not only storm risks, but also that the company is more leveraged than most peers (i.e., Reported Debt / Net PP&E is 61%, which trails only Pacific Gas & Electric at 62% and is much higher than the cohort average of 47%), is smaller than most and is toward the lower half in terms of expected metric performance.

Exhibit 4

ELL's financial requirements are more stringent than many comparable companies that also face high exposure to environmental risks.

					12-Month Projected CFO	Upgrade	Downgrade	
Company Name	Rating	Outlook	Net PP&E	Reported Debt	pre-WC to Debt	Threshold	Threshold

Source: Moody's Financial Metrics

Besides storm cost securitization, ELL is looking to accelerate storm hardening efforts of its transmission and distribution assets, as a primary way to mitigate the physical asset risks associated with climate change. While higher capital costs add to other categories of rate pressure (e.g., inflation, high interest rates) and customer affordability risks, they will also make ELL's network more modern, durable and resilient to storm events.

Financial metrics will rebound after securitization, but could remain weakly positioned

ELL's financial metrics have mostly rebounded following the completion of storm cost securitization. On a run-rate basis, we estimate that the company's FRP construct, rate base and authorized capitalization and earnings will result in CFO pre-WC to debt metrics consistently at or above its 18% downgrade threshold, as seen in the exhibit below. The company could outperform these expectations by generating more deferred tax benefits or improving earned returns. By way of sensitivity, if we incorporate a \$750 million storm event into our projections (excluding the cash flow decline from nonpaying customers) every three years, ELL's CFO pre-WC to debt would be around 17% on a rolling three year average, assuming its average adjusted debt capitalization (i.e., debt / (debt + equity)) remains around 48%.

INFRASTRUCTURE AND PROJECT FINANCE

Exhibit 5 ELL's ratio of CFO pre-WC to debt is expected to be at or slightly above its 18% downgrade threshold in the coming years 20.0% 16.0% 12.0% 8.0% 4.0% 0.0% 2018 2019 2020 2021 2022 LTM 1Q23 2023E 2024E 2025E

*The financial metric shown is one of several factors that could cause a downgrade if the metric is below that level on a sustained basis. Source: Moody's Financial Metrics and Moody's projections

ESG considerations

ELL's ESG Credit Impact Score is CIS-3 (Moderately Negative)

Exhibit 6 ESG Credit Impact Score

CIS-3

For an issuer scored CIS-3 (Moderately Negative), its ESG attributes are overall considered as having a limited impact on the current rating, with greater potential for future negative impact over time. The negative influence of the overall ESG attributes on the rating is more pronounced compared to an issuer scored CIS-2.

Source: Moody's Investors Service

ELL's **CIS-3** indicates that ESG considerations have a limited impact on the current credit rating with greater potential for future negative impact over time. Physical climate risks such as storms and increased exposure demographic and social trends, including a less supportive regulatory environment and customer affordability concerns, could weaken credit quality over the long-term.

Environmental

ELL's **E-4** issuer profile score reflects the company's service territory, which is concentrated on the Gulf of Mexico and exposes ELL to material and extreme weather events that can cause customer outages and costly repairs. The company also operates nuclear-fueled generation, which includes operational risks around spent fuel waste and pollution management of radioactive uranium.

Social

The company's **S-3** issuer profile score is driven by the fundamental utility risk that demographics and societal trends could include social pressures or public concern around affordability, utility reputational or environmental issues. In turn, these pressures could result in adverse political intervention into utility operations or regulatory changes. ELL's nuclear generation also carries unique public safety risks that other forms of generation do not.

Governance

ELL's **G-3** issuer profile score is driven by that of its parent. Entergy's G-3 issuer profile score reflects heightened risk around the company's financial strategy and risk management, given risk factors contained in SEC filings that suggest that management, in the event of an adverse legal decision for affiliate subsidiary System Energy Resources, Inc. (SERI, Ba1 negative), could explore other financing options or protections for SERI, including extending, restructuring, or retiring its indebtedness and prioritizing its obligations. This has negative implications for management's views with regard to subsidiaries meeting their financial obligations.

ESG Issuer Profile Scores and Credit Impact Scores for ELL are available on Moodys.com. In order to view the latest scores, please click <u>here</u> to go to the landing page for ELL on MDC and view the ESG Scores section.

Liquidity analysis

ELL's internal liquidity is adequate when considering its access to Entergy's \$3.5 billion master credit facility and strong capital market access.

We expect ELL's internal liquidity to consist of around \$1.8 billion of cash flow from operations, compared to about \$1.6 billion of capital expenditures over the next 12 months. As a result, ELL's free cash flow position will largely depend on its dividend policy. Through LTM 31 March 2023, ELL had upstreamed \$659 million dividends to Entergy, compared to an annual average of \$208 million between 2018 and 2022.

ELL's external liquidity includes access to the Entergy System money pool along with its own \$350 million revolving credit facility, which matures in June 2028. The stand-alone facility requires ELL to meet a 65% debt to capitalization covenant. At 31 March 2023, ELL was in compliance with its credit facility covenant and had no revolver borrowings and no letters of credit outstanding and was in a net receivables position under the money pool.

ELL also has two separate \$105 million facilities under nuclear fuel company variable interest entities (i.e., for the River Bend and Waterford facilities), each set to expire in June 2025. At 31 March 2023, ELL had around \$59 million and \$52 million outstanding on the respective facilities. Additionally, ELL has access to an uncommitted standby letter of credit facility, in order to support its MISO obligations, for which there was \$20 million in letters of credit outstanding at 31 March 2023.

ELL's next long-term debt maturities consist of \$325 million of 4.05% mortgage bonds in September 2023 and \$665 million of 0.62% mortgage bonds due in November 2023.
