Re: Unresolved Significant Deficiency Report
Village Guthrie Subdivision - LA1103066
St Tammany Parish

Dear Mr. Johnson,

Based on our records the above water system has not completed corrective action for significant deficiencies cited in the sanitary survey conducted on 01/27/2022. A report detailing the unresolved significant deficiencies is attached.

In accordance with Revised Statute 40:5.9.1 (Act 98 2021 Legislative Session) LDH is required to post grades for community water systems by January 1, 2023. Unresolved significant deficiencies are considered in the grading process and can adversely affect the water system's grade.

Please submit documentation to the regional office for deficiencies that have been addressed.

Please feel free to contact me at or with questions or comments.

Respectfully,

A handwritten signature in cursive script, appearing to read "Salowa Sultana".

Deficiency Code: 20T393

TREATMENT PLANT #1

LAC 51:XII.319.D.23 and LAC 51:XII.203.I.2 - Storage tanks and pipelines for liquid chemicals shall be specified for use with individual chemicals and not used for different chemicals. Offloading areas shall be clearly labeled to prevent accidental cross-contamination.

The sodium hypochlorite storage container was not properly labeled at the time of inspection. Designate storage tanks and pipelines for individual chemical use. Clearly label chemical offloading areas.

The seal of the State of Louisiana is a circular emblem. It features a central figure of a pelican feeding its young in a nest. The nest is surrounded by a wreath. Above the pelican, the words "UNION • JUSTICE" are inscribed. Below the nest, the word "CONFIDENCE" is written. The outer border of the seal contains the text "STATE OF LOUISIANA" at the top and "1804" at the bottom, separated by small stars.

An Equal Opportunity Employer

If ITEMS are in the "DATE NOT COMPLIED" column, daily penalty assessments shall begin to accrue immediately from this date forward and continue to accrue until such time that the agency has confirmed that compliance has in fact been achieved. The public water system must notify the agency in writing that compliance has been achieved. Such notification should be transmitted to the agency by one of the following methods:

1. Use of the United States Postal Service via certified mail-return receipt requested, registered mail-return receipt requested, or express mail-return receipt requested.
2. Transmission by facsimile machine will also be accepted; however, the state health officer shall be deemed not to have requester has received a written acknowledgment, via facsimile or mail, or receipt from the Office of Public Health.
3. Use of a private shipping service, such as United Parcel Service, Federal Express, etc. when such a service can provide a written receipt to the sender stating the date of delivery to the state health officer.

Once the agency is notified of correction, agency staff shall conduct a follow-up investigation in order to confirm compliance. Such follow-up investigation shall be conducted within ten (10) working days of agency receipt of the public water system's written notice of compliance. If upon agency's follow-up investigation it is found that non-compliance still exists, staff will so advise the public water system in this same manner. At this time, previously running daily penalty assessments will continue to accrue pending yet additional written notification of compliance by the public water system to the agency. When the results of the follow-up investigation confirm that compliance has in fact been achieved, then the date that the agency received written notification of compliance from the public water system, for the particular provision(s) of the administrative compliance order in question, shall be considered the last day of non-compliance for purposes of calculating the duration for non-compliance with the particular provision(s).

Nothing herein shall be interpreted to prevent additional investigative inspections to determine continued compliance or non-compliance while the Administrative Order remains in effect.

- 4.) Submit plans and specifications which are signed, sealed, and dated by a Professional Engineer licensed in the State of Louisiana for the installation of a secondary source of groundwater. Such plans and specifications are to be submitted to Office of Public Health's (OPH) Southeast Region IX Office at: OPH, Southeast Region IX Office, 42354 Deluxe Plaza, Suite 12, Hammond, Louisiana 70403. When plans and specifications are disapproved, revised plans and specifications addressing all noted conflicts with the State Sanitary Code or upon which further information was requested shall be re-submitted within thirty (30) days of receipt of said disapproval.

OR

Have a water well driller licensed by the Louisiana Department of Natural Resources conduct an evaluation of Well No. 1 (1103088-001) to determine corrections and repairs needed to return Well No. 1 (1103088-001) to operating as designed and permitted by LDH. Submit the Well Driller report for returning the Well No. 1 (1103088-001) to service to the Office of Public Health's (OPH) Region IX Office at: OPH, Southeast Region IX Office, 42354 Deluxe Plaza, Suite 13, Hammond, Louisiana 70403

OR

Submit an agreement and plans/specifications which are signed, sealed, and dated by a Professional Engineer licensed in the State of Louisiana for the installation of an interconnection with one or more adjoining public water systems currently meeting all of the state primary drinking water standards. Such agreement must include permission from the appropriate authorities overseeing the adjoining public water systems indicating sufficient capacity for supplying all of the

PWS ID No. 1103088
Central Park Subdivision Water System

potable water to the Central Park Subdivision Water System in the event of primary source failure. Such plans and specifications are to be submitted to Office of Public Health's (OPH) Southeast Region IX Office at: OPH, Southeast Region IX Office, 42354 Deluxe Plaza, Suite 12, Hammond, Louisiana 70403. When plans and specifications are disapproved, revised plans and specifications addressing all noted conflicts with the State Sanitary Code or upon which further information was requested shall be re-submitted within thirty (30) days of receipt of said disapproval. *(Relates to Violation number 1.)*

No later than March 1, 2022, Respondents shall comply with the following remedial action item of this order:

- 5.) Install a secondary source of ground water in accordance with the approval of plans and specifications cited in ordered remedial action item 3.) above OR complete corrections and repairs needed to return Well No. 1 (1103088-001) to operating as designed and permitted by LDH OR install a connection to the approved public water supply of sufficient capacity for supplying all of the potable water to the Central Park Subdivision Water System. *(Relates to Violation number 1.)*

Parks Waterworks Inc.

To whom it may concern,

In regard to A.O. No.: C-21-103-015-ETT, we are currently in contact with a well drilling company to begin plans for developing a new secondary water source. At the moment, we are also taking action to repair the current well (Well No. 1 (1103088-001) but will most likely not succeed in this endeavor. As for the third remedial option of tying into another neighboring water system, we have contacted the City of Slidell multiple times in the past about installing a metered tap on their water main that is in close proximity to our system and they have denied us permission every time. Re-establishing a secondary water source in Central Park Subdivision is a top priority to us, here at Parks Waterworks Inc., and we are acting promptly to get this issue resolved as quickly as possible.

Parks Waterworks Inc.,
Tristan Johnson
