Grant of this Petition will further the public interest by expanding the availability of competitive telecommunications services in the State. In addition, intrastate offering of these services is in the public interest because the services will provide customers with access to new technologies and service choices and can permit customers to achieve increased efficiencies and cost savings. Petitioner's entry into the intrastate wireless telecommunications services market thereby will enhance the telecommunications infrastructure in the State and will facilitate economic development.

In particular, the public will benefit directly, through the use of the competitive services to be offered by Petitioner's, and indirectly, because the presence of Petitioner in this market will increase the incentives for other wireless providers to operate more efficiently, offer more innovative services, reduce their prices, and improve their quality of service.

WHEREFORE, Petitioner requests that this Commission grant its Petition for Authority to Operate as a Reseller of Commercial Mobile Radio Services within the State of Louisiana.
